	<b>MEMORANDUM Notice to Mariners</b>	<b>Issue Date 25/06/2026</b>
		<b>Page 1 of 4</b>

**Notice to Mariners: Notice of Upcoming Maintenance work**

**1) Summary**

Further to the most recent NtM KOWL-MEM-0001-100rev1 previously issued on 18/06/2026, this second updated revision reflects most recent expected start date due to a delay in arrival of the Obana JUV at the Kincardine wind farm.

Please be advised that there will be a programme of maintenance work (estimated 4 weeks duration, excluding weather) at the Kincardine Field. The work will be inside the wind farm area and close to the floating assets. The scope of the operations is:

- Main component exchange on four assets

The work is expected to start around 30 June 2026.

Petrodec Obana Jack Up Vessel (JUV) shall be on site, along with support tugs, which will be listening on channel 16 at all times. The JUV will locate close to each affected asset and use its main crane to carry out the exchanges.

The below temporary changes to the aids to navigation should be noted, only for the period of the works:-

- KIN01, KIN02, KIN04 and KIN05 fog signals will be disabled (KIN03 will remain active).
- The KIN01, KIN02, KIN04 and KIN05 navigation lights will be shielded in turn, only for the period the JUV is located in close proximity, in order to avoid confusion between the individual platform and the JUV navigation lights (i.e. only one platform navigation lights will be shielded at any time).

An exclusion zone of 500m shall apply around the Obana and vessels are requested to avoid the wind farm area.
